

Put Down Your Feelings

A I have worked and improved my land for over 40 years... taking raw land and making stone bridges, walkways, a swimming pool, planters, castles. I've planted most of the trees, all the cactus and other plants, and planned everything from my imagination and with my own hands!

I would like my work and land preserved and maintained and open to all children and others to enjoy forever.

I want to appoint some people I trust to help me plan the best way to insure my dreams and watch over the land.

Possible Steps

- B Pick people you can trust to help make plans
- C Talk with people about different ways to preserve the land
- D Consider the role of family and others
- E Organize a group to watch over and carry out your plans
- F Make plans legal

If you want to talk to me about this please call --- collect if you want
