

Mr. Maurice Fredericks  
6950 Commerce Boulevard  
Rohnert Park, CA 94928

Dear Mr. Fredericks:

At our meeting in your office on February 4, of this year, you promised Susan Richter and myself that you would meet with John Medica to talk about altering his will to allow a locally developed group to preserve his works and his land as to his wishes.

You also said that you would send copies of the document you prepared to Richter and myself. As of this date I have not received anything from your office.

I am quite concerned. This is at least our 4th meeting over more than a 2 year period where you promised to determine John's wishes and prepare the proper papers. At our second meeting (with John and Suzanne Palmer of Santa Rosa) John made it very clear that he wished to alter his will to allow the protection of his works. You promised to prepare the papers first thing, when you got back from a backpacking trip. This was not done. My letters and phone calls and John's phone calls remained unanswered. When I finally gained your attention you made it sound like you never were at that meeting with John and wanted to start over again. Later (fall 1986) SPACES's attorney started correspondence and phone conversations with you and went as far as informing you of sections of applicable law and drafting a document for your information. You, again, promised to act upon that information and again did not do so. Exactly the same thing at the February 4th meeting.

What is going on! There is a point where attorney responsibility to his client is exchanged for a private agenda, we are there. If you had any suspicions, you had over two years to check them out. We are determined to proceed and protect John's dreams for the future of his site and allow John to enjoy the attention he deserves.
