Dear S.R.:

Would you tell the girl who is writing the article on Duke that the man that has done our welding and helps Duke put the items together is Larry Torix. We would like him to get the credit that is due him.

Sometimes Duke just hands his some tools and such and he puts them together on his own. He enjoys doing this kind of thing and also is an antique and junk collector. He has worked for us about ten years in the fiberglass business. Duke usually guides him when he is welding but he does put some of himself in the pieces. He's 36 years old and sort of a handy man.

Let us know when you can be up to pick up the items so we can get them un-bolted.

Regards,

Francis C
