Dear Rusty,

I've just returned from a gathering of people in San Francisco who are involved one way or another with those large scale environments which we care about. One of these people, Starr Sutherland, is working on a project which I think you would be interested in.

Starr has 10 hours of video tape on Jesse Howard which he is trying to turn into a one-hour film. Much of the work is done, except for a few inserts, and whatever is involved in finishing the film. Being a resident of Illinois he has no access to grants from the Missouri Arts Council and has had no luck here in California getting funds for a "Missouri film." I thought you might have some suggestions - or interest in some kind of collaboration.

One way or another I wanted you to know that the material existed. Can I give him your address....? would you like to contact him direct?

It would be great if something could come of this....a film on Jesse would certainly be a great addition to the field.

My best,

Seymour Rosen
