

May 6

Hi Nancy

Thanks for all you have done to help Mom and George. Mom has been contacted by a person named Beers(?) and has an appointment with a social agency.

Dr. Learn was very direct regarding George's illness. At present, there is no cure but barring unforeseen circumstances, the disease will take two to three years to run its course. Given time, let's hope for a cure.

According to Mom, Clayton stopped drinking when George went to the hospital.

Your concern is appreciated. Best wishes to you and your mother.

Sincerely

Sandy Adams
